

LUNCH&LEARN:

MICHIGAN DITCH LANDSLIDE AND TUNNEL: A New Tunnel and Unique Delivery Method

Nate Soule is Vice President and co-founder of Lithos Engineering. He has 16 years of experience in a variety of tunneling, geotechnical, and geological engineering projects. He focuses primarily on urban tunneling and trenchless engineering including microtunneling, tunnel boring machines, auger boring, pipe ramming, HDD, drill and blast, and hand mining. Further experience includes management and engineering for projects including water and wastewater pipelines, treatment plants, gravel pit reservoir storage projects, landslide repairs, and commercial and residential construction.

Wednesday, February 1
12:00 p.m.*
Berthoud Hall 243

*LUNCH WILL BE PROVIDED
