Stephen Harelson is a Program Engineer for the Colorado Department of Transportation, where he has been employed since 2002. Prior to working at CDOT, he worked as a consulting engineer in Denver, Boston and Summit County. He has a bachelor’s degree in Mechanical Engineering from Colorado State University, and a Masters in Civil Engineering from the University of Colorado. Notable projects he has worked on include the Fire Suppression System in the Eisenhower-Johnson Tunnel, the Veterans Memorial Tunnel reconstruction in Idaho Springs, and the I70 Mountain Express Lanes in Clear Creek County. Mr. Harelson is a native of Leadville, and as a child witnessed much of the original construction of the Interstate in the 1970s.
